*Burnett Dairy Co-op
Cooler, Production, & Dock Addition and
Office & Store Additions/Remodeling
Grantsburg, WI*

Evans Freimuth Architects, LLC provided Architectural services for a 31,000 square foot Cooler, Production, & Dock addition/remodeling project and a 15,000 Office & Store addition/remodeling project at Burnett Dairy Co-op facility at Grantsburg, Wisconsin.

Both of these projects utilized a fast-track method for the construction. The new Cooler and Shipping operations needed to be functional to free up the space for the store remodeling. Burnett Dairy Co-op began filling the racks in the new Cooler by March of 2012 and they moved into their new Office before Christmas of the same year; and the Store was open for business the entire time except for a few hours.

This project was a Design-Build Project where Evans Freimuth Architects was hired by the General Contractor for Architectural and Structural services. It varies year by year, but typically 10 - 20% of EFA's projects are Design-Build.
