

# We've Solved Your Standby & Sustainable Power Challenges

*With modular, plug & play switchgear, cleaner backup power solutions, & advanced dispatch software that reduces costs & lowers carbon emissions.*

**Reduces Your Energy Costs**

**Scalable Solutions Operate In 12 Months**

**Lower Carbon Emissions**

**Equipment, Software & Service Support**

**Advanced Technology For Dispatch With Solar & Storage**

- *Eliminate peak costs & hedge volatile power markets.*
- *Gain access to lower cost renewable grid power.*
- *Avoid backup diesel power's environmental challenges with natural gas generators.*
- *Turnkey built site power generation system in 12 months.*
- *Provides expandable electric distribution for site renewable energy, storage & EV charging.*

### *Our Simple Step By Step Process*

- Preliminary Feasibility and Financial Screening – at no cost.
- Define the Permitting, Interconnect, & Operating Strategies.
- Provide Equipment and Installation Design – EPC Cost Bid Package.
- Offer Business Case & Financing Options.

# Engineering Experience You Can Count On Since 1981

- **Control System Integration**
- **Manufacturing Execution Systems**
- **IT/OT Convergence Systems**
  - Industrial Foundation Networks
  - Cloud Based IIOT Applications
- **Panels & Modular Manufacturing**
  - Control Panel Fabrication
  - Substation Modular Enclosures
- **Facilities Engineering**
  - Mechanical Designs
  - Process Engineering
  - Electrical Engineering
- **Electrical & Power Engineering**
  - Power Engineering for Substation T&D
  - Power Automation, Monitoring & SCADA
  - Electrical Testing & Commissioning
- **Architectural & Civil/Structural**
- **Federal A-E Design Service**
- **Design Packaging Solutions**
- **Rotating Equipment Control System**
- **Environmental Information Systems**
- **Energy Sustainability & Microgrids**
- **Industrial Water Treatment**
- **Capital Project Management**
