Partnering With Wunderlich-Malec's Industrial Foundation Network Group (IFN) Will Keep Those Sleepless Nights At Bay.

We understand your challenges that keep you up at night & we're here to partner with you so you can get a good night's sleep. Our team supports clients with operational technology (OT) & OT infrastructure services for your industrial automation & control system's needs. Being the largest & well-established engineering, system integration, & process automation provider in North America, we'll not only meet but exceed your needs. Located in Wunderlich-Malec's corporate offices in Eden Prairie, Minnesota we provide best in class solutions addressing your operational technology (OT) & OT infrastructure challenges through our network of 40 offices nationwide.

• 40+ Years Of Experience • 600+ Employees • 10K+ Completed Projects • 40 Offices Nationwide

Operational Technology (OT) Is Different From Information Technology (IT)

OT directly impacts your physical environments, causing changes through the monitoring or control of devices, processes & events. OT & IT do share tools & skills, but OT has very different priorities due to real-world impact. Practices that are acceptable in IT environments can compromise industrial automation environments. Today's OT requirements have evolved beyond do-it-yourself. Success requires specialized skillsets beyond automation engineering and IT.

We Know The Challenges Of Operational Technology Infrastructure

Industrial automation & control systems are only as reliable as the OT infrastructure they are built on. Inadequate Infrastructure can lead to the following:

- **Security Breaches**
- **Communications Failure**
- **Disruption Of Critical Functions**
- **Data Loss**
- **Compromised Product Quality**
- **Health & Safety**
- **Your Bottom Line**

We Have A Portfolio Of Services To Help Meet Your Needs

We deliver a suite of essential OT infrastructure functions in one integrated platform that is fully functional, highly available, and secure.

OT Infrastructure Gap Assessments For:
- **Essential Functionality**
- **Capacity & Growth**
- **Cybersecurity**

New IFN Or Upgrade Projects
- **Implement Or Improve OT Infrastructure**
- **Standalone implementation, or as part of ICS projects**

IFN Managed Services
- **Coordinate OT Functions With IT**
- **Administer & Maintain OT Infrastructure.**

Help Desk, Admin & Engineering

IT & OT - Better Together!
IFN+ (Combined OT+IT)
- **IT & OT Coordinated Design**
- **Lower Costs**
- **Increased Performance**
- **Streamlined Administration**
- **Integrated Managed Services Available**

Establish IT - OT Partnership
- **Align IT & OT missions, roles, & architecture to meet Automation needs**
